Hello:

During the summer, volunteers from the Environment Committee paid a visit to the owners of the properties of our beautiful estate. The purpose was to inform them of the existence of the committee and its actions. The committee's mandate is to promote the quality of our environment and of our lake.

Of the 88 properties, there are only 31 whose occupants have not been met because they were absent. Everyone we met showed a great deal of interest in the measures to conserve water quality.

During our meetings with the owners or tenants, we discussed the environmental issues of concern and gave three documents to everyone. If you have not received these documents, please find them attached. We hope you enjoy reading them.

We are fortunate to live in an exceptional environment and with the involvement of each and everyone of us we will be able to maintain its high quality.

The volunteers of the Environment Committee would like to thank all the residents who welcomed them into their homes with enthusiasm, smiles, and openness. It was a pleasure to share our ideas and concerns with you.

We invite you to visit our website where you will find a wealth of information on many aspects of our estate, particularly on the environment.
